

Mother's 3rd Arm

How many times have you had to stop what you are doing to pick up a baby bottle, sipper cup or other item that your child has just thrown on the dirty floor, again?

For years parents have said, "I've only got two arms". Now let us introduce to you every parents wish, "a third arm" - MOTHER'S 3rd ARM.

MOTHERS 3rd ARM

- assists children with or without special needs
- is a soft flexible arm which can be attached to both flat and round surfaces
- adjusts to hold cups and accessories for easy reach
- helps you hold the babies bottle during feeding time
- is covered with a safe Non-Toxic durable foam
-

The product will secure safely without scratching or damaging the surface its being attached to. From prams, strollers, tabletops and high chairs to a shopping cart, car seats and almost anywhere imaginable. Mothers 3rd Arm attaches at any angle, allowing complete freedom to use under most circumstance. The insulated foam holder is attached to a bendable arm that rotates 360 degrees, can be bent in any direction and locks into any position. All moving parts lock into place so small prying hands cannot easily remove the unit. The bottle holder and arm are covered with a safe Non-Toxic durable foam.

Now everyone can get MOTHER'S 3rd ARM and have the little helper that every parent deserves.
